

Drift Acoustic Wall Panel - 2880x750

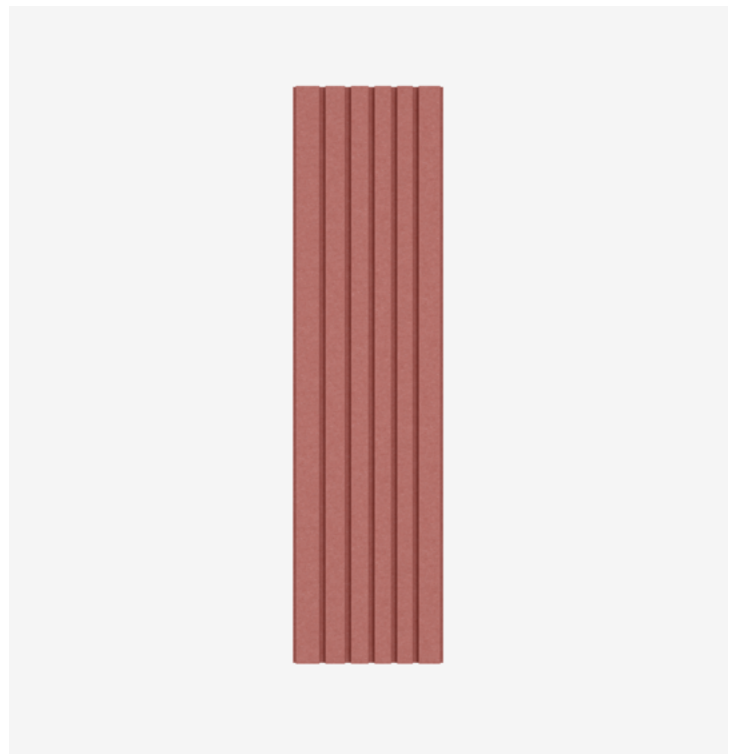

wall system

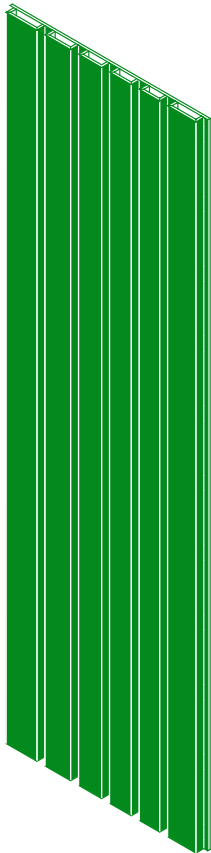

refelt

Drift Acoustic Wall Panel transforms flat surfaces into dynamic, rhythmic walls with its varied horizontal design. The straight PET Felt bands in alternating widths absorb sound and reduce echo, improving acoustic comfort in busy interiors. Made from recycled plastic bottles, Drift is a durable, expressive solution for calmer, better-sounding interiors in offices and public spaces.

The rhythmically placed bands create a lively visual pattern across the wall, adding depth and movement through their deliberate variation while maintaining a contemporary, organic aesthetic.

USP's

- Unique 3D wall effect
- Improves acoustic comfort
- Made from recycled PET felt
- Also available in our Standard collection
- Combines seamlessly with our Pleat Acoustic Wall Panel

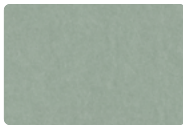

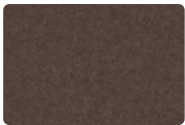

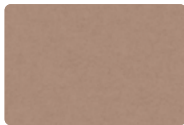

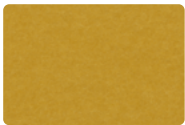

PET Felt

Our PET Felt is a sustainable and durable material made from recycled plastic bottles. The ground-up bottles are transformed into fibres, forming a soft yet sturdy felt with an open-cellular structure. This gives the material excellent acoustic properties, making it naturally sound-absorbing. PET Felt is easy to maintain, impact-resistant and fully recyclable.

Haze	Polar	Mint	Fern	Moss	Pine	Brown
						
Copper	Biscuit	Tan	Linen	Coral	Ruby	Ochre

Colour variations

Slight colour variations are a natural result of using recycled fibres in PET Felt panels. Each panel has a front and a back side, as the fibre nap runs in a specific direction on each surface. For a consistent finish, always install the panels with the front side facing out, and align them in the same direction throughout.
