

Acoustic Ceiling Tile - 600x600

ceiling system

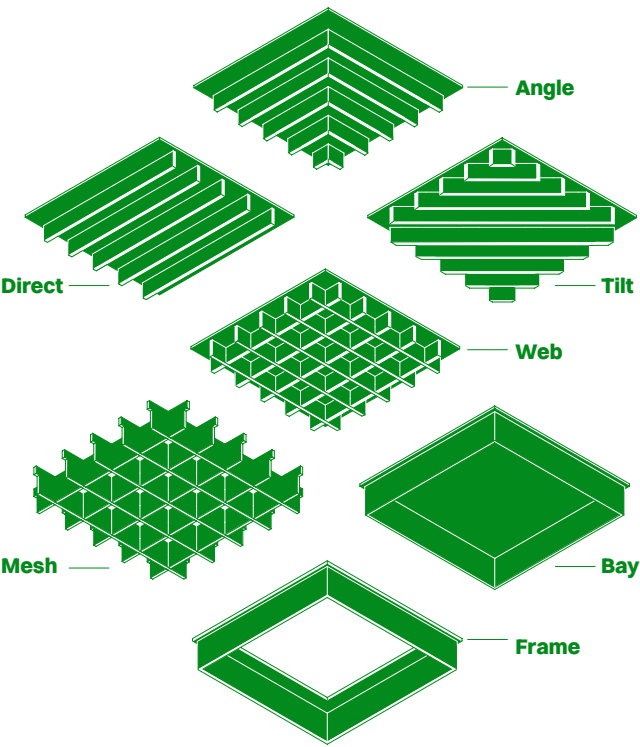

refelt

A standard suspended ceiling becomes something worth looking up at. These 60x60cm acoustic tiles drop into existing T24 grid systems and absorb sound from the moment they go in, but their real value is what they do to a room's sense of order.

Different tile patterns let you lay out a ceiling with intention. Zone a workspace, signal a threshold, draw the eye toward a destination. The overhead plane stops being neutral and starts doing real work.

USP's

- Fits standard 60x60cm grid systems (T24)
- Multiple patterns for endless combinations
- Improves acoustic comfort
- Made from recycled PET Felt
- Easy drop-in installation
- Sold per set of 4

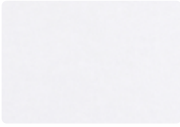

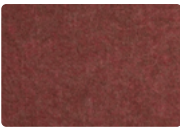

PET Felt

Our PET Felt is a sustainable and durable material made from recycled plastic bottles. The ground-up bottles are transformed into fibres, forming a soft yet sturdy felt with an open-cellular structure. This gives the material excellent acoustic properties, making it naturally sound-absorbing. PET Felt is easy to maintain, impact-resistant and fully recyclable.

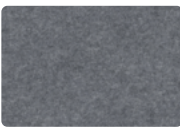

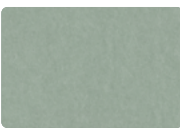

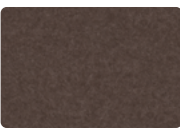

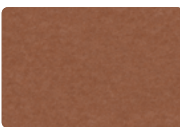

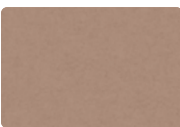

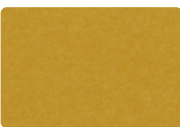

Downloads

3D files, care & maintenance recommendations and installation guides are available at refelt.com.

Standard Collection

						
Black	Dark Grey	Grey	Light Grey	Marble	Camel	Coconut

Haze	Polar	Mint	Fern	Moss	Pine	Brown
						
Copper	Biscuit	Tan	Linen	Coral	Ruby	Ochre

Colour variations

Slight colour variation is natural in recycled PET Felt.
To keep the finish consistent, install all panels in the
same direction and with the same side facing out.
