

Flat Acoustic Ceiling System - 1200x1800

ceiling system

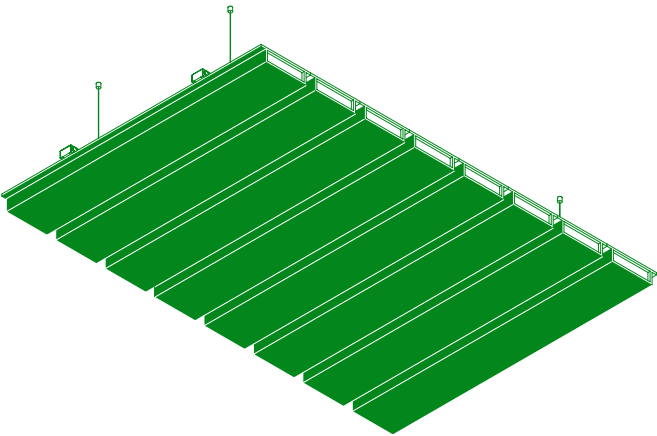

refelt

The Flat Acoustic Ceiling System offers a complete solution specifically designed for spaces with a low ceiling. The contiguous baffles capture sound directly at the source, delivering great acoustic performance and effectively reducing reverberation. Thanks to the hollow structure of the baffles, the system takes sound absorption one step further.

Made from sustainable PET Felt and supported by the EasyGrid system, installation is fast, simple and requires no tools.

Product overview

Collection	Standard
Baffles	PET Felt
EasyGrid	Steel (Black)
Size	1200 x 1800 x 100 mm
Total weight	14 kg
Cable lenght	100 cm

USP's

- All-in-one acoustic ceiling system
- Great acoustic performance
- Made from recycled plastic bottles
- Smart installation system
- Adjustable in height
- Ideal for spaces with a low ceiling

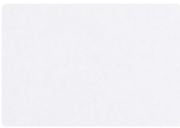

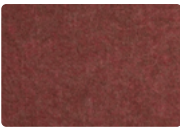

PET Felt

Our PET Felt is a sustainable and durable material made from recycled plastic bottles. The ground-up bottles are transformed into fibres, forming a soft yet sturdy felt with an open-cellular structure. This gives the material excellent acoustic properties, making it naturally sound-absorbing. PET Felt is easy to maintain, impact-resistant and fully recyclable.

Downloads

3D files, care & maintenance recommendations and installation guides are available at refelt.com.

Standard Collection

						
Black	Dark Grey	Grey	Light Grey	Marble	Camel	Coconut
						
Dark Blue	Cobalt	Denim	Blue	Sky	Cinnamon	Honey
						
Grape	Violet	Frost	Smoke	White	Beige	Sand
						
Wine	Red	Orange	Yellow	Green	Lime	Dark Green

Colour variations

Slight colour variations are a natural result of using recycled fibres in PET Felt panels. Each panel has a front and a back side, as the fibre nap runs in a specific direction on each surface. For a consistent finish, always install the panels with the front side facing out, and align them in the same direction throughout.
