

# Slant Acoustic Ceiling System - 1200x1800

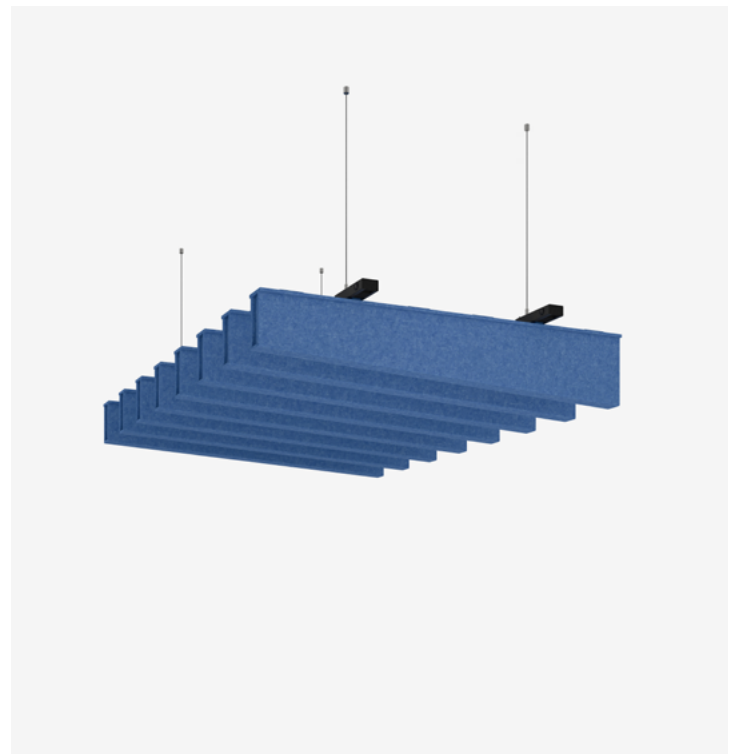

ceiling system

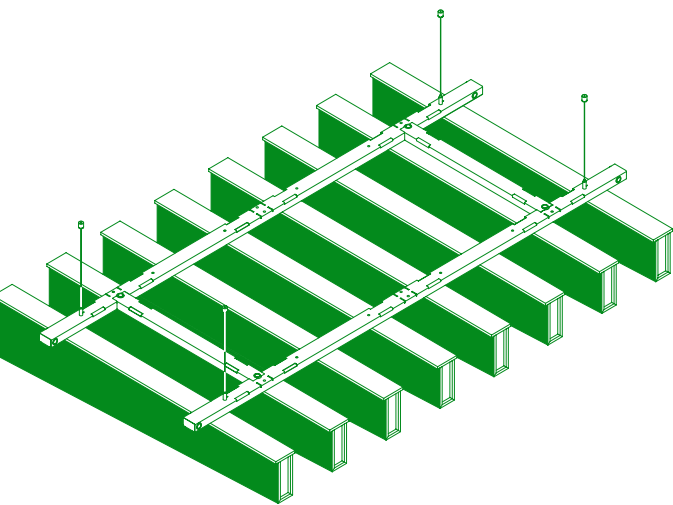

# refelt

The Slant Acoustic Ceiling System offers a complete acoustic solution for spaces with exposed ceilings, such as open-plan offices, canteens and large halls. The sloping baffles create a distinctive optical effect, with options to hang them in an angular pattern or a single uniform row. Thanks to the hollow structure and 60mm thickness, the baffles deliver superb acoustic performance, reducing both reverberation and echo.

Made from sustainable PET Felt and supported by the EasyGrid system, installation is fast, simple and requires no tools.

Product overview

|              |                             |

USP's

- All-in-one acoustic ceiling system
- Improved sound-absorbing effect
- Made from recycled plastic bottles
- EasyGrid for fast and simple installation
- Adjustable in height

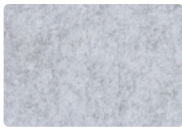

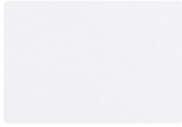

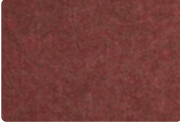

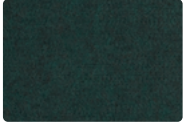

PET Felt

Our PET Felt is a sustainable and durable material made from recycled plastic bottles. The ground-up bottles are transformed into fibres, forming a soft yet sturdy felt with an open-cellular structure. This gives the material excellent acoustic properties, making it naturally sound-absorbing. PET Felt is easy to maintain, impact-resistant and fully recyclable.

Colour variations 

Slight colour variations are a natural result of using recycled fibres in PET Felt panels. Each panel has a front and a back side, as the fibre nap runs in a specific direction on each surface. For a consistent finish, always install the panels with the front side facing out, and align them in the same direction throughout.
