

# Arcs Acoustic Divider

- 2400x600

panels

# refelt

Inspired by the Japanese Seigaiha wave, Arcs Acoustic Divider features a repeating arc pattern cut into the surface. Suspended from the ceiling, the divider defines areas within a space without closing them off, making it well suited to offices, restaurants, and open-plan interiors. Sold in sets of 2, it can be combined to divide larger spaces or used on its own to mark a smaller zone.

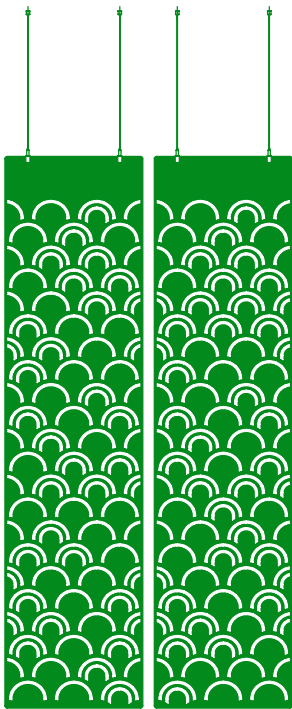

Made from PET Felt, the divider delivers strong acoustic performance and is easy to mount at any height.

- Made from recycled plastic bottles
- Circular cut-out pattern
- Effective sound absorption
- Simple to install, reposition, or remove
- Sold in sets of 2

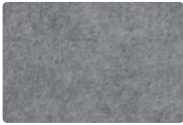

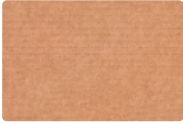

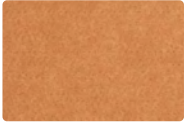

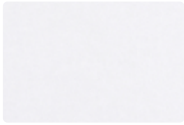

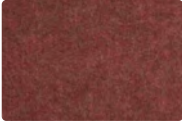

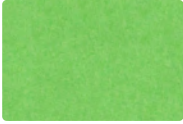

**PET Felt**

Our PET Felt is a sustainable and durable material made from recycled plastic bottles. The ground-up bottles are transformed into fibres, forming a soft yet sturdy felt with an open-cellular structure. This gives the material excellent acoustic properties, making it naturally sound-absorbing. PET Felt is easy to maintain, impact-resistant and fully recyclable.

Colour variations

Slight colour variations are a natural result of using recycled fibres in PET Felt panels. Each panel has a front and a back side, as the fibre nap runs in a specific direction on each surface. For a consistent finish, always install the panels with the front side facing out, and align them in the same direction throughout.
