

Streets Acoustic Divider

- 2400x600

panels

refelt

Seen from above, a city grid of intersecting roads inspires the continuous V-cut pattern across Streets Acoustic Divider. Suspended from the ceiling, the divider defines areas within a space without closing them off, making it well suited to offices, restaurants, and open-plan interiors. It can be combined to divide larger spaces or used on its own to mark a smaller zone.

Made from PET Felt, the divider delivers strong acoustic performance and is easy to mount at any height.

Product overview

Collection	Standard
Material	PET Felt
Hanging fixture	Steel
Dimensions 1 divider	2400 x 600
Thickness	9 mm
Cord length	max. 1000 mm
Weight pet set	4.4 kg

USP's

- Made from recycled plastic bottles
- Circular cut-out pattern
- Effective sound absorption
- Simple to install, reposition, or remove
- Sold in sets of 2

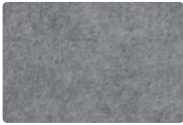

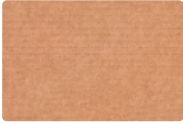

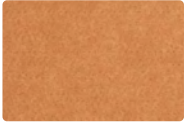

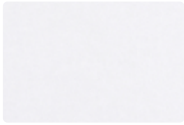

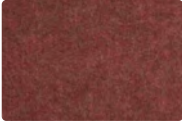

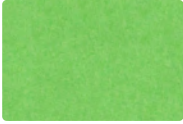

PET Felt

Our PET Felt is a sustainable and durable material made from recycled plastic bottles. The ground-up bottles are transformed into fibres, forming a soft yet sturdy felt with an open-cellular structure. This gives the material excellent acoustic properties, making it naturally sound-absorbing. PET Felt is easy to maintain, impact-resistant and fully recyclable.

Downloads

Standard Collection

						
Black	Dark Grey	Grey	Light Grey	Marble	Camel	Coconut
						
Dark Blue	Cobalt	Denim	Blue	Sky	Cinnamon	Honey
						
Grape	Violet	Frost	Smoke	White	Beige	Sand
						
Wine	Red	Orange	Yellow	Green	Lime	Dark Green

Colour variations

Slight colour variations are a natural result of using recycled fibres in PET Felt panels. Each panel has a front and a back side, as the fibre nap runs in a specific direction on each surface. For a consistent finish, always install the panels with the front side facing out, and align them in the same direction throughout.
