USP's

- Flexible solution for curved surfaces
- Bendable with a min. radius of 500 mm
- Easy to mount and process
- Made from fire-retardant PET Felt
- Sound-dampening effect

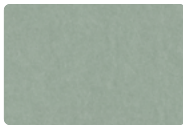

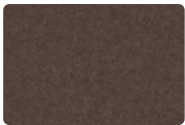

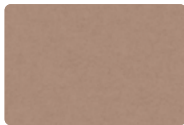

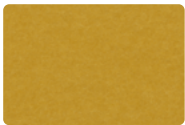

PET Felt

Our PET Felt is a sustainable and durable material made from recycled plastic bottles. The ground-up bottles are transformed into fibres, forming a soft yet sturdy felt with an open-cellular structure. This gives the material excellent acoustic properties, making it naturally sound-absorbing. PET Felt is easy to maintain, impact-resistant and fully recyclable.

Refined Collection

						
Fog	Ash	Gravel	Basalt	Teal	Navy	Steel Blue
						
Haze	Polar	Mint	Fern	Moss	Pine	Brown
						
Copper	Biscuit	Tan	Linen	Coral	Ruby	Ochre

Colour variations

Slight colour variations are a natural result of using recycled fibres in PET Felt panels. Each panel has a front and a back side, as the fibre nap runs in a specific direction on each surface. For a consistent finish, always install the panels with the front side facing out, and align them in the same direction throughout.
