

Pleat Acoustic Wall Panel - 2880x750

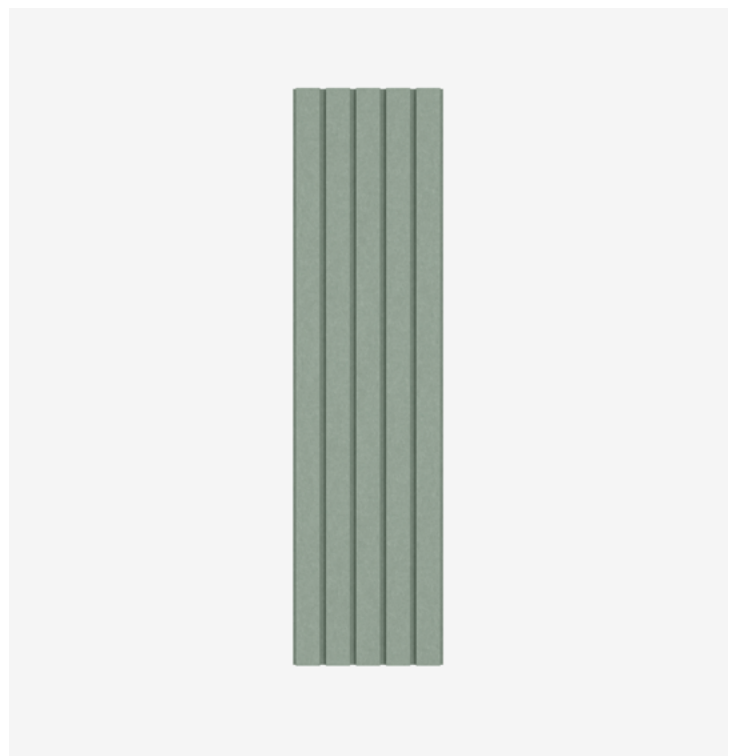

wall system

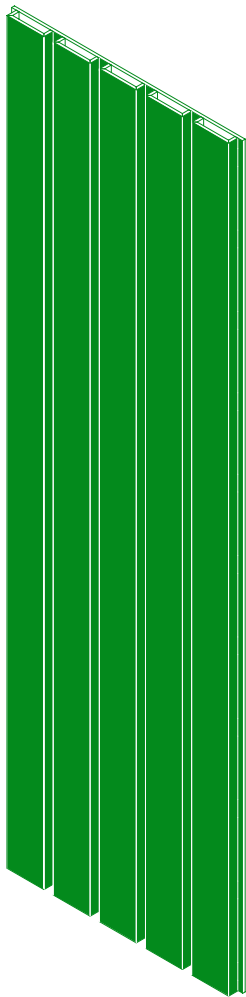

refelt

Pleat Acoustic Wall Panel transforms flat surfaces into structured, linear walls with its clean horizontal design. The straight PET Felt bands absorb sound and reduce echo, improving acoustic comfort in busy interiors. Made from recycled plastic bottles, Pleat Acoustic Wall Panel is a durable, minimalist solution for calmer, better-sounding spaces in offices and public areas.

The parallel bands create a steady rhythm across the wall, adding depth through subtle layering while maintaining a contemporary, understated aesthetic.

USP's

- Unique 3D wall effect
- Improves acoustic comfort
- Made from recycled PET Felt
- Also available in our Standard collection
- Combines seamlessly with our Drift Acoustic Wall Panel

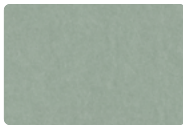

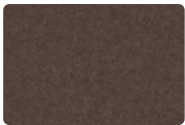

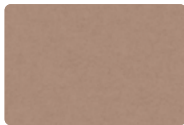

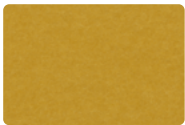

PET Felt

From discarded plastic bottle to statement in sustainable design. PET Felt transforms recycled bottles into a versatile material that combines softness with durability. The fiber material offers superior acoustic solutions, requires minimal maintenance and lasts for years. At the end of its lifecycle, the material can be recycled again.

Refined Collection

						
Fog	Ash	Gravel	Basalt	Teal	Navy	Steel Blue
						
Haze	Polar	Mint	Fern	Moss	Pine	Brown
						
Copper	Biscuit	Tan	Linen	Coral	Ruby	Ochre

Colour variations

Slight colour variations are a natural result of using recycled fibres in PET Felt panels. Each panel has a front and a back side, as the fibre nap runs in a specific direction on each surface. For a consistent finish, always install the panels with the front side facing out, and align them in the same direction throughout.
